

## DOG TRAINING MANIKIN

### FOR PROFESSIONALS WHO SAVE LIVES

It's not just people who need rescuing! Sometimes our four-legged friends get into trouble too, whether walking on cliff top beauty spots, out on river estuaries or even just in the local park.

It's human nature to try and help our pets and many people get into trouble trying to rescue their dog – therefore it's vital that the fire and rescue service and other search and rescue teams consider canine rescues as part of their regular training.

Our dog manikins are perfect for training with other teams and even multi-agency exercises involving helicopters (air rescue), the Coastguard and Mountain Rescue organisations.

# DOG TRAINING MANIKIN

## IDEAL FOR THE FOLLOWING TRAINING SCENARIOS:

Suitable for a range of rescue training scenarios including USAR, Mountain Rescue and Military training.

### SPECIAL MATERIALS:

Constructed from the same flame retardant material used in Police ballistic/stab vests, offering 4x the strength and abrasion resistance of 16oz canvas or P.V.C. (conforms to OEKO-TEX® Standard 100, BS EN ISO 12947-2 & 14116: 2008). High density webbing (25mm rated to 200 Kg, 50mm rated to 435Kg with a +/-5% range).

### FEATURES & BENEFITS:

- Anatomically correct weight distribution to give the 'feel' of an unconscious canine.
- Tough enough to withstand being buried under concrete or steel lintels, driven over by a 4x4 vehicle, or dropped from a 2nd floor window without damage.
- Water repellent material, making it suitable for wet or foul scenarios such as HAZMAT/CBRN.
- Soft body joints to eliminate the risk of pinch welts and bruising; common injuries when using plastic bodied manikins.

### AVAILABLE WEIGHTS & SIZES:

DESCRIPTION	MODEL CODE	WEIGHT (KG)
